

MITCON

CERTIFICATION COURSE IN

# FULL STACK DEVELOPER

Course that takes students through the basics of web development to complete, functioning projects.

COURSE

# OVERVIEW

This Specialization teaches you how to develop syntactically valid coding techniques to create interactive web experiences. By mastering this set of technologies, you'll be able to create high-quality websites that perform on mobile, tablet, & large-screen browsers.

Throughout the capstone, you will create a professional-quality web portfolio that demonstrates your development as a web developer and your understanding of accessible web design. This will involve your ability to develop and build a responsive site that makes use of resources to make it accessible to a wide range of users, including those with visual, audial, physical, & cognitive disabilities.
