# AI (Artificial Intelligence)

# Course Overview

Artificial Intelligence will define the next generation of software solutions. This computer science course provides an overview of AI, and explains how it can be used to build smart apps that help organizations be more efficient & enrich people's lives. Artificial Intelligence is a unique career path that can lead you to success.

## Course Outline

- ✓ Introduction to AI & Applications
- ✓ Foundation of AI (Problem Solving & Search Techniques)
  - Algorithmic Strategies
    - Divide & Conquer, Greedy, Branch & Bound
    - Knowledge Representation
    - Reasoning System
    - Expert Systems
- ✓ Regression
  - Linear • Non-linear • Multiple
- ✓ Deep Learning
  - Supervised • Unsupervised
- ✓ Basics of Neural Network
  - Convolution Neural Network
    - Text & Image Classification
    - Parameter Tuning
    - Advancement in NN
  - Recurrent Neural Network
    - Building RNN
    - Times Series Forecasting
- ✓ AI Vs ML Vs DL
- ✓ Case Studies
  - Recommendation System
  - Uber Routing System (Alternative)
  - Fraud Detection & Analysis

# Who Can Join

- Freshers
- BE/ Bsc Candidate
- Any Engineers / Graduate
- Any Post-Graduate
- Working Professionals

# Career Opportunity

- ✓ Big Data / AI Engineer
- ✓ Business Intelligence Developer
- ✓ Data / Research / Robotics Scientist
- ✓ Machine Learning Engineer
- ✓ AI Data Analyst / Product Manager

## Certification

We provide National Skill Development Corporation (NSDC) certificate after successful completion of course
